16.0 INDEX OF AMENDMENTS26

1.0 AUTHORITY

Pursuant to the authority vested in the Wilton Planning Board by the voters of the Town of Wilton by vote of the Town Meeting, September 11, 1968, and in accordance with the provisions of RSA 674:35 of the New Hampshire Revised Statutes Annotated, as amended, the Wilton Planning Board adopts the following regulations governing the subdivision of land in the Town of Wilton, New Hampshire.

These regulations are designed to accomplish the purposes set forth in RSA 674:36 and for the purposes of protecting the health, safety, convenience and economic and general welfare of Wilton citizens.

2.0 DEFINITIONS

- 2.0.1 Abutter. Any person whose property adjoins or is directly across the street, rights-of-way or stream from the land under consideration by the Board. If an abutting property is under condominium or other collective form of ownership, the officers of the collective or association, as defined in RSA 356-B:3, XXIII, shall receive the formal notification. For purposes of receiving testimony only, and not for the purpose of notification, the term "abutter" shall include any person who is able to demonstrate that his land will be directly affected by the proposal under consideration.
- 2.0.2 Applicant. The owner of record of the land to be subdivided or his duly authorized agent.
- 2.0.3 Approval. Recognition by the Board, certified by written endorsement on the plat, that the plat meets the requirements of these regulations and in the judgment of the Board satisfies all criteria of good planning and design.
- 2.0.4 Board. Planning Board for the Town of Wilton.
- 2.0.5 Buffer. An area within a property or site, generally adjacent to and parallel with the property line, either consisting of natural existing vegetation or created by the use of trees, shrubs, fences and/or berms, designed to limit continuously the view of and/or sound from the site to adjacent sites, properties or roads.
- 2.0.6 Certified Soil Scientist. A person who by reason of special knowledge and experience is qualified to practice soil science and who has been duly certified by the board of natural scientists under RSA 310-A:75.
- 2.0.7 Common Drive. The section(s) of a private way over which an easement is granted for a driveway.
- 2.0.8 Completed Application. The application form and all supporting documents containing the information the Board needs to make an informed decision, including all fees and administrative expenses as indicated in these regulations.
- 2.0.9 Consulting Engineer. The duly designated engineer for the Town of Wilton.
- 2.0.10 County Conservation District. The Hillsborough County Conservation District (hereafter HCCD).
- 2.0.11 Designated Representative. The staff planner for the Wilton Planning Board.

*WILTON LAND USE LAWS AND REGULATIONS
SUBDIVISION REGULATIONS*

- 2.0.12 Development. A planning or construction project involving substantial property improvement and, usually, a change of land use character within the site; the act of using land for building or extractive purposes.
- 2.0.13 Disturbed Area. An area where the ground cover is destroyed or removed leaving the land subject to accelerated erosion.
- 2.0.14 Driveway. A paved or unpaved area used for ingress or egress of vehicles, and allowing access from a street to a building or other structure or facility.
- 2.0.15 Dwelling Unit. One or more living or sleeping rooms arranged for the use of one or more individuals living as a single family housekeeping unit, with cooking, living, sanitary and sleeping facilities.
- 2.0.16 Easement. A right-of-way granted, but not dedicated, for limited use of private land for a public or quasi-public purpose and within which the owner of the property shall not erect any permanent structures.
- 2.0.17 Engineer. The duly designated engineer for the Applicant.
- 2.0.18 Erosion. The detachment and movement of soil or rock fragments by water, wind, ice, or gravity.
- 2.0.19 Frontage. The continuous length of a lot bordering on the public right-of-way providing the principal route of access to a lot, subdivision or other type of development.
- 2.0.20 Grading. Any excavating, grubbing, filling (including hydraulic fill), or stockpiling of earth materials or any combination thereof, including the land in its excavated or filled condition.
- 2.0.21 High Intensity Soil Survey (HISS). A soils map of a parcel of land being considered for development on a perimeter survey, with a minimum scale of one inch (1") equals one hundred feet (100'), where soils are identified and mapped in accordance with the high intensity soils mapping standards as adopted by the Hillsborough County Conservation District. All HISSs must be conducted by a certified soil scientist.
- 2.0.22 Licensed Land Surveyor. A land surveyor who is licensed by the State of New Hampshire under RSA 310-A:53.
- 2.0.23 Lot Consolidation. The elimination of an existing boundary line between two parcels under single ownership.
- 2.0.24 Lot Line Adjustment. The relocation of an existing boundary line.
- 2.0.25 Lot or Parcel. A single area of land defined by metes and bounds or boundary lines as shown in a recorded deed or on a recorded plan.
- 2.0.26 Performance Guarantee. Any security such as a bond, irrevocable letter of credit or other sufficient security that may be accepted by the municipality as a guarantee that the improvements required as part of an approved application for development are satisfactorily completed.

*WILTON LAND USE LAWS AND REGULATIONS
SUBDIVISION REGULATIONS*

- 2.0.27 Plat. A map, plan, drawing or chart on which the subdivision plan is presented to the Wilton Planning Board for approval, and which, if approved, will be submitted to the Hillsborough County Register of Deeds for recording.
- 2.0.28 Private Way. A driveway which provides access to a minimum of 2 and a maximum of 4 lots and which the Town has no duty to maintain.
- 2.0.29 Road Agent. The duly designated Road Agent for the Town of Wilton.
- 2.0.30 Roadway. The finished road surface designed and prepared for vehicular traffic.
- 2.0.31 Sediment. Solid material, either mineral or organic, in suspension that is transported, or has been moved from its site of origin by erosion.
- 2.0.32 Soil Erosion and Sediment Control Plan. A plan that minimizes soil erosion and sedimentation resulting from development and includes, but is not limited to, a map and narrative.
- 2.0.33 Street. Any street, avenue, boulevard, road, alley, highway and other public way proposed for vehicular traffic including all of the land in the right-of-way.
- 2.0.34 Subdivider. The registered owner, or the authorized agent for the registered owner of a subdivision.
- 2.0.35 Subdivision. The division of a lot, tract, or parcel of land into two or more lots, plats, sites, or other divisions of land for the purpose, whether immediate or future, of sale, rent, lease condominium conveyance or building development. It includes resubdivision and, when appropriate to the context, relates to the process of subdividing or to the land or territory subdivided. The division of a parcel of land held in common and subsequently divided into parts among the several owners shall be deemed a subdivision.
- 2.0.36 Subdivision, Major. The subdivision of land into four or more lots for building development purposes.
- 2.0.37 Subdivision, Minor. The subdivision of land into not more than three lots with no potential for resubdivision that fronts on an existing street and requires no new streets, utilities, or other municipal improvements, including lot-line adjustments and lot consolidations.

3.0 PROCEDURES

3.1 Preapplication Review.

Prior to the submission of a formal application the applicant is encouraged to come to the Board for a preapplication review. The preapplication review provides an opportunity for the applicant and the Board to discuss the concept of the proposal in the con-text of the Town's master plan and regulations. All discussions during the preapplication review phase are non- binding. The information requirements identified and the direction given by the Board during the preapplication review will benefit the applicant in the long-run by saving money and time on engineering and redesign at a later date. Though the preapplication review phase is optional, the Board strongly recommends that applicants for major subdivisions participate in this process. There is one optional phase to preapplication review: conceptual consultation.

3.1.1 Conceptual Consultation. The applicant may request a meeting with the Board to discuss the concept for the proposal in general terms. The conceptual consultation is informal and will adhere to the following.

- a. The applicant will make an appointment with the Board's secretary no later than fifteen days prior to the regular meeting at which the applicant is requesting to be heard.
- b. The applicant may bring in a site location or a base map of the site which provides minimal detail of the proposal.
- c. The Board will review the proposal with regard to the master plan and the zoning ordinance, answer questions on local regulations and provide guidance relative to state and local regulations.
- d. The conceptual consultation does not require formal notification of abutters.

3.1.2 Design Review. *(Repealed September 19, 2007)*

3.2 Completed Application.

A completed application will provide sufficient information to allow the Board to make an informed decision. A completed application sufficient to invoke the jurisdiction of the Board shall include all of the information required in Section 6.0 -- Preliminary Plat Submission Requirements, Section 9.0 -- Design Standards and the Subdivision Plan Review Checklist, additional studies requested by the Board and adhere to the following procedures.

3.2.1 Waivers.

The applicant may request that the Board waive any of the requirements contained in Section 6.0- -Preliminary Plat Submission Requirements, the Subdivision Plan Review Checklist and any other standards. Requests for waivers should be discussed with the Board's designated representative during the preliminary review. The designated representative may make a recommendation to the Board. The Board shall vote to grant or deny the applicant's request for

a waiver from a specific section of these regulations and the Board's decision shall be recorded in the minutes of the meeting.

3.2.2 Preliminary Review.

All subdivision proposals must be reviewed by the Board's designated representative prior to the submission of an application to the Board's secretary. This review will determine if the application and the preliminary plats conform to the requirements of the Town's regulations. At this time the applicant will be informed of any deficiencies which will need to be corrected before the proposal can be placed on the agenda for formal consideration. If the application conforms with the regulations or needs only minor revisions, the Subdivision Plan Review Application may be submitted to the Board's Secretary. Any questions regarding submission should be directed to the Chair of the Board.

3.2.3 Application Filing.

A Subdivision Review Application must be filed with the Board's secretary 22 days before the regular meeting of the Board at which the applicant or his agent wishes to appear. All of the information required for a completed application by Section 6.0 - Preliminary Plat Submission Requirements, the Subdivision Plan Review Checklist, additional studies requested by the Board and the information required on the Subdivision Review Application form must accompany the application.

3.2.4 Public Notice.

The secretary will notify the applicant or his agent and the abutters of the submission of an application and/or the date of the public hearing on a proposal by registered mail at least 10 days prior to the meeting. A public notice shall be posted in 2 public places and printed in a newspaper of general circulation in the Town at least 10 days prior to the meeting. If the notice for the public hearing was included in the notice of submission or any prior notice, additional notice of the public hearing is not required. Notice of an adjourned session of a hearing is not required provided that the date, time and place of the adjourned session is announced at the prior meeting.

3.2.5 Submission and Acceptance.

An incomplete application filed by the applicant will not be submitted to the Board and public notices will not be issued. If the applicant fails to supply information required by these regulations or the subdivision plan review checklist and/or to pay the fees required by these regulations, the application will not be considered by the Board. An application shall only be submitted to and accepted by the Board at a public hearing with proper notice as required by RSA 676:4,I(d). After the applicant's presentation, the Board will discuss the proposal and receive comments from abutters and the general public. If the Board is satisfied that the application is complete, a vote to accept the application may be taken at this time. If accepted, the date of acceptance recorded in the minutes begins the 90 day review period. Should the Board not accept the application, they must state their reasoning and specify any additional requirements.

Incomplete applications that have not been acted upon by the applicant will be continued on the agenda for 2 consecutive monthly meetings from the date of submission. At this time the

application may be voted on by the Board and may be disapproved for insufficient information. Written notice of the disapproval will be forwarded to the applicant or his agent.

3.2.6 Minor Subdivisions.

Minor subdivisions and lot-line adjustments shall follow the same application procedures as other subdivisions; however, they may receive expedited review by the Board where deemed appropriate. Minor subdivisions which do not create lots that are further subdividable may be accepted and approved in one meeting provided the application has been properly noticed and the required information has been provided to the Board to make an informed decision. To consolidate two (2) or more lots, applicants must complete and the Planning Board designee must sign, the "Caveat Lot Consolidation" form found on page B-25. Copies of this form shall be sent to the HCRD and to the local assessor. The landowner(s) shall present a copy of the deed describing the lots to be consolidated to the Planning Board's designee, and all applications for lot consolidations must include a notarized, written statement by the owner(s) that the lots being consolidated are not subject to separate mortgages or other encumbrances. (Amended March 1997.)

3.2.7 Review of a Completed Application.

Between the time the completed application is accepted and approved, the Board will review the proposal to evaluate the potential impacts on existing Town facilities and services, surrounding natural resources, transportation and/or abutting properties. The Board's designated representative will review and comment on the application with regard to State and Town land use regulations and accepted planning practices. Before making the final decision on the application, the Board may require additional information or detailed review of information submitted by the applicant. The Board will inform the applicant of the need for additional information or consulting reviews. The Applicant is responsible for the cost of all application reviews by the Board's designated representative and/or a consultant. The Board may request that the Applicant set up an escrow account with the Town to cover the cost of obtaining these consulting services.

3.2.8 Action on a Completed Application.

The Board shall act to approve, conditionally approve or disapprove a completed application within 90 days of its acceptance. The Board may apply to the Selectmen for an extension of the review period not to exceed 90 days. In addition, the applicant may waive the requirement for Board action within the specified time limit and consent to a mutually agreed upon extension.

If the Board has not taken action on a completed application within 90 days of its acceptance and has not obtained an extension, the applicant may obtain an order from the Board of Selectmen directing the Board to act within 15 days. Failure of the Board to act on the order shall constitute grounds for the applicant to petition the Superior Court as provided in RSA 676:4, I(c).

3.2.9 Approval.

Approval of the subdivision shall be by affirmative vote of a majority of the Board. The plat is certified by the signature of the Board Chair and Vice-chair and the date of approval on the mylar copy of the plat. The Board will transmit the signed mylar to the Hillsborough County Register of Deeds along with the recording fee paid by the applicant. The approved plat will

not be recorded until all fees have been paid by the applicant.

3.2.10 Conditional Approval.

The Board may grant conditional approval of an application. If the remaining actions on the application are administrative in nature; do not involve discretionary judgment by the Board; and/or involve the possession of permits and approvals granted by other boards or agencies such as the Wetlands Board, the Department of Transportation or Water Supply and Pollution Control Division, a further public hearing is not required to grant final approval. A further public hearing will be required to demonstrate compliance with the terms of all other conditions pursuant to RSA 676:4, I(i). Final approval will be granted when the conditions have been met to the satisfaction of the Board. The plat will not be recorded at the HCRD until all of the conditions have been met. If the conditions are not met by the next regular monthly meeting after the date at which conditional approval was granted, the Board will determine the appropriate action to be taken on the application.

3.2.11 Disapproval.

If an application is not approved, the reasons for disapproval will be clearly stated in the Board's records and in written notice provided to the applicant.

4.0 FEES

A completed application for a subdivision will only be accepted if accompanied by the required fees established in the Town of Wilton Application Fee Schedule, contained in Appendix III. Failure to pay the fees constitutes valid grounds for the Board to terminate further consideration of the application and to disapprove the plat without a public hearing.

Pursuant to RSA 676:4, I(g), the applicant is responsible for paying reasonable fees to cover the cost of special investigative studies, environmental assessments, legal reviews of documents, administrative expenses and other matters which are required for the Board to make an informed decision.

5.0 GENERAL REQUIREMENTS FOR THE SUBDIVISION OF LAND

The subdivider shall observe the following general requirements and principles of land subdivision.

5.1 Compliance with the Subdivision Regulations.

No subdivision of land shall occur; no land in any subdivision shall be sold or offered for sale, lease, rental, condominium conveyance or building development; and no street or utility construction shall be started until a final plat, prepared in accordance with the requirements of these regulations, has been approved by the Board, all other required permits have been issued and the plat has been recorded at the Hillsborough County Registry of Deeds (HCRD).

Where strict conformity to the Subdivision regulations would result in undue hardship or injustice to the owner of the land, a subdivision plan substantially in conformity with regulations may be approved by the Board provided the spirit of the regulations, and public health, safety and welfare are not adversely affected.

5.2 Compliance with Federal, State and Local Plans and Regulations.

The plan shall comply with local land use regulations and building codes, and applicable State and Federal laws or regulations.

5.3 Site Analysis.

An analysis will be conducted to assess the positive and negative development characteristics of the site. The analysis will include: soils; topography; existing vegetation; threatened and endangered species; wetlands and surface waters; drainage patterns; groundwater resources; existing structures and road networks; existing and future easements; open space and visual features; historic features; present and future use of the site; impact on public services and facilities such as water, sewer, schools, fire and police; and surrounding land uses. The layout of the subdivision will be based on the site analysis. To the maximum extent possible, development will be located to preserve the natural features of the site, to avoid environmentally sensitive areas and to minimize negative impacts.

5.4 **Land Characteristics.**

Land of such character that it cannot, in the judgment of the Board, be safely used for building development purposes because of exceptional danger to health or peril from fire, flood, poor drainage or other hazardous conditions, shall not be platted for residential, commercial or industrial subdivision, nor for such other uses as may increase the danger to life or property, or aggravate the flood hazard. Land with inadequate characteristics or capacity for subsurface sewage disposal shall not be subdivided for residential, commercial or industrial purposes unless connected to a municipal sewer system.

5.5 **Special Flood Hazard Areas.**

For subdivisions that involve land designated as “Special Flood Hazard Areas” (SFHA) by the National Flood Insurance Program (NFIP):

- a. The Planning Board shall review the proposed development to assure that all necessary permits have been received from those governmental agencies from which approval is required by Federal or State law, including Section 404 of the Federal Water Pollution Control Act of 1972, 33 U.S.C. 1334.
- b. The Planning Board shall require that all proposals for development greater than 50 lots or 5 acres, whichever is lesser, include Base Flood Elevation (BFE) data within such proposals (i.e. floodplain boundary and 100-year flood elevation).
- c. The Planning Board shall require the applicant to submit sufficient evidence (construction drawings, grading and land treatment plans) so as to allow a determination that:
 1. all such proposals are consistent with the need to minimize flood damage;
 2. all public utilities and facilities, such as sewer, gas, electrical and water systems, are located and constructed to minimize or eliminate flood damage; and,
 3. adequate drainage is provided so as to reduce exposure to flood hazards.

5.6 **Scattered or Premature Subdivision.**

The Board shall provide against any scattered or premature subdivision of land which would be injurious to public health, safety or prosperity because of inadequate water supply, drainage, transportation, schools, fire protection or other public services, or would necessitate the excessive expenditure of public funds for the supply of such services.

5.7 **Additional Studies.**

The Board may require the applicant to conduct and submit additional studies needed to assist the Board in making an educated and informed decision on the proposal including, but not limited to, traffic, fiscal impact, recreation, public service and environmental impact analyses.

5.8 **Visual Quality.**

In examining and passing upon a proposed subdivision the Board may make recommendations to the subdivider relating to earth movement and retention of natural cover in order to preserve the natural, visual quality of Wilton and its environment.

5.9 **Parks and Open Space.**

Areas set aside for parks, playgrounds and open space, either dedicated to the Town or reserved for the common use of the property owners, shall be of reasonable size and character suitable to the purpose. Reserve strips of land which, in the opinion of the Board, show intent on the part of the subdivider to control access to land dedicated or to be dedicated for public use shall not be permitted.

5.10 **Utility Easements.**

The boundaries of proposed permanent easements for utilities over or on the property and drainage ways shall be shown on the plat. Easements shall have a minimum width of 20 feet. Adequate access from existing or proposed public ways shall be provided for each easement. Water courses proposed for public control shall have a permanent easement of not less than 20 feet.

5.11 **Legal Documents.**

Legal documents, including but not limited to easements, restrictive covenants, or other documents affecting legal title to the property, shall be submitted for review to the Board and Town Counsel, and approved, in form and substance by Town counsel prior to the approval of the subdivision.

6.0 *PRELIMINARY PLAT SUBMISSION REQUIREMENTS*

The following guidelines are designed to provide the Board with the information necessary to make informed decisions and to establish a uniform format for plat layout.

6.1. *Plat Standards.*

The applicant shall file 6 copies of the preliminary plat, any associated information, or additional requested information with the Board. All plats shall conform to the standards established below and contain the following:

- a. the proposed subdivision name, name and address of the owner of record, name of the subdivider and engineer or surveyor, and the date of first draft located in the lower right corner of the plat;
- b. the tax map and lot number(s) of the parcel(s) being subdivided and the zoning districts within which it is located;
- c. the signature of the owner or his/her designated representative;
- d. the seal and signature of a land surveyor licensed in the State of NH;
- e. the seal and signature of a professional engineer licensed in the State of NH (where required for engineering designs);
- f. horizontal scale not to exceed 100 feet to the inch (the preferred scale is 50 feet to the inch);
- g. vertical scale not to exceed 40 feet to the inch;
- h. sheet size 11 X 17 inches or 22 X 34 inches;
- i. separate sheets shall be numbered consecutively, showing their relationship to each other;
- j. a margin of at least 1 inch shall be provided outside ruled border lines on 3 sides and at least 2 inches along the left side for binding;
- k. the purpose of the subdivision;
- l. lots will be numbered consecutively starting with 1 and include the map and original parcel letter/number (for example: lot F12 divided into 3 lots produces F12-1, F12-2 and F12-3);
- m. signature block located in the lower right above the title;
- n. a locus map at a scale of 1 inch equals 1,000 feet showing the location of the site within the Town;
- o. a bar scale for the plat;
- p. magnetic and true north arrows;
- q. a revision block sectioned off to record the date and the changes of each revision; and
- r. a notes section for information relative to the plan.

6.2 *Abutting Property Information.*

The following information shall be provided on the plat for all abutting properties:

- a. tax map and lot numbers;
- b. the names and addresses of the owners of record;
- c. abutting subdivision names;
- d. the names, locations and dimensions of existing streets, easements, setbacks, alleys, parks and public open spaces;

- e. the location of existing buildings, septic system leachfields, water supply wells and protective well radii within 100 feet of the property boundaries;
- f. the location of property lines; and
- g. the location of existing driveways within 200 feet of the property boundaries.

6.3 Subdivision Information.

The applicant shall provide the Board with the following information regarding the parcel to be subdivided:

- a. A boundary survey for the entire parcel including bearings, distances and the locations of permanent markers with a maximum error of closure of 1 part in 10,000.
- b. The locations, bearings and distances of proposed lot lines, including the length of frontage on a public right-of-way, and the locations of monuments, pins and drill holes clearly and accurately identified on the plat.
- c. The area of all proposed lots denoting wetland area, dry area and total area (in acres).
- d. Existing and proposed topography for the entire parcel with contour intervals not to exceed 5 feet.
- e. The location of the 100 year floodplain as designated on the National Flood Insurance Program, Flood Insurance Rate Maps for the Town of Wilton.
- f. Soil types and locations of soil boundaries as certified by a registered engineer, certified soil scientist or the Soil conservation Service.
- g. A high intensity soil survey for the entire parcel for major subdivisions (The applicant may request a waiver of this requirement and one may be granted based on an evaluation by the Board. In making its decision, the Board may consult with the Hillsborough County Conservation District or other consultant selected by the Board.).
- h. The location of all water bodies, watercourses, wetlands, rock/ledge outcrops or other significant natural features. Any areas proposed for dredge and fill shall be noted on the plat.
- i. Any easements, buildings, utility lines or other features existing on the parcel.
- j. The location of existing and proposed water, sewer and drainage systems accompanied by plans for the proposed system indicating interconnections, profiles and elevations; drainage plans will be based on a 25 year storm event.
- k. If public water and/or sewer services are proposed for use, a letter from the water and/or sewer commissions stating the availability of and the intent to provide service.
- l. Erosion and sediment control plans based on a 25 year storm event in accordance with the standards set forth in Appendix II.
- m. Existing and proposed plans for telephone, electric and other public utilities with a letter of intent from the utility companies to provide service.
- n. If on-site water is to be provided, the locations of proposed water supply wells and protective radii.
- o. If on-site waste disposal is to be provided, the locations of the 4,000 square foot septic reserve area, test pits and test pit information for each lot.
- p. The locations, names and widths of existing and proposed streets and highways showing grades, radii, culvert locations and bridge designs in conformance with the standards set forth in Appendix I.
- q. Proposed driveway locations with a note on the plan that any driveway relocation requires prior approval of the Board.

- r. The locations and dimensions of any proposed easements and associated legal documents as prescribed in Section 5.11.
- s. The location of all parcels of land to be dedicated for public use and associated legal documents as prescribed in Section 5.11.
- t. If the proposed subdivision covers only a portion of the entire tract, a statement concerning the intended future use of the remainder and a sketch of the prospective future street system. The street system for the submitted portion will be considered with regard to adjustments and connections with the street system for the entire parcel.
- u. The existing zoning district boundaries as designated on the Town of Wilton Zoning Map.
- v. Any revisions made to any sheets are to be so noted in the revision block.
- w. A Curb-cut Approval Permit from the NH Department of Transportation for subdivision driveways and/or streets accessing a state highway or a letter of approval from the Wilton Road Agent for driveways and streets accessing local roads.
- x. Copies of all federal, state and local permits which may be required for the project including NH Water Supply and Pollution Control Division (WSPCD) Subdivision Septic Approval permit, NH WSPCD Site Specific Permit, NH Wetlands Board Dredge and Fill and Army Corps of Engineers Dredge and Fill.
- y. A letter from the Fire Chief stating that proposed water supplies provide sufficient volume, pressure and flow for fire protection and that access for emergency vehicles is adequate.
- z. The proposed use of the subdivision (i.e. single-family, multi-family, industrial).
- aa. A line drawing plan of the subdivision drawn to scale of the tax map.

6.4 Field Delineation.

The following aspects of the proposal will be delineated in the field to facilitate ease of identification during site investigations.

- a. Wetland areas are to be flagged in the field prior to the submission of the application.
- b. The center line of all proposed roads shall be staked.
- c. All monuments must be in place or a performance guarantee sufficient to cover the cost of installation must be posted prior to the approval of the application.

7.0 ***FINAL PLAT.***

The applicant shall submit 6 paper copies of the complete proposal and one Mylar original, in permanent black ink, for each page of the final plat to be recorded in conformance with the standards of the Hillsborough County Register of Deeds (HCRD). All 6 copies shall be signed and dated; 4 copies will remain with the Town and 1 will be for the applicant's records. The Mylar original(s) will be dated and signed by the Chair and the Vice-Chair of the Board and recorded at the HCRD. The approval signature block shall provide adequate space for the necessary endorsement by the proper authorities, and read: "Approved by the Wilton Planning Board on _____. Certified by _____, Chair and by _____, Vice-Chair or designated member." The Mylar original final plat shall contain all of the basic information for the subdivision, include all applicable permit numbers and conform with the standards set forth in Sections 6.1, 6.2 and 6.3 minus the topography and soils information.

8.0 ***PERFORMANCE GUARANTEE***

As a condition of approval, the Board may require the posting of a performance guarantee by the owner or his agent in an amount sufficient to guarantee satisfactory completion of all necessary improvements which are included in the final proposal, including but not limited to, street construction or completion; public improvements; the extension and construction of water and sewer lines and associated facilities; storm water drainage systems; erosion and sediment control structures; and fire safety structures. The amount of the guarantee will be based on an estimate of costs provided by the applicant and a review of the estimate by the Board's consulting engineer, the cost of which will be paid by the applicant. The cost of periodic inspections by the Board's consulting engineer is to be included in the guarantee. Performance guarantee shall be posted prior to the approval of the final plat. The value of the guarantee shall be re-computed if the project is not to be completed within 1 year of approval.

The form of the guarantee shall be approved by the Planning Board, Town counsel and the Board of Selectmen. The terms of the guarantee shall precisely identify the work to be performed, the completion schedule, the standards for judging satisfactory completion and the conditions for release of the guarantee. In the case of phased development plans, separate guarantees may be required for each phase and must be posted prior to commencing construction on the individual phase.

The guarantee shall be released upon satisfactory completion of all improvements and the receipt by the Board of the required "as-built plans" provided by the developer.

9.0 *DESIGN STANDARDS*

Site improvements shall be designed, installed and constructed in conformance with the standards contained in these regulations.

9.1 *Monumentation.*

Monuments constructed of concrete or stone at least 4 inches across the top and at least 36 inches long shall be set at all block corners and iron pins or equivalent markers at all lot corners. Drill holes shall be set at least 1 inch deep and be at least 1/2 inch in diameter. Drill holes shall be set in an unmovable stone. Iron pins shall be at least 1 inch in diameter and set in the ground a minimum of 36 inches, or if physical conditions do not permit, the pins shall be set in concrete.

9.2 *High Intensity Soil Surveys.*

High intensity soil surveys (HISS) are required for all major sub-divisions. The applicant may request a waiver of this requirement from the Board. A waiver may be granted based on an evaluation of the site by the Board, its designated representative and/or a recommendation by the Hillsborough County Conservation District (HCCD) or other consultant selected by the Board.

High intensity soil surveys (HISS) shall be conducted in the following manner.

- a. All HISS will be prepared by a certified soil scientist.
- b. A paper copy showing the proposed development and the HISS information shall be provided to the Planning Board. The map shall contain the seal and signature of the certified soil scientist and any qualifying notes made by the soil scientist.
- c. If a soil classification provided on the HISS map is in dispute, the Planning Board may request an evaluation of the soil designations by the HCCD.
- d. Ground control, consisting of numbered flags, stakes, walls, trees, or other easily identifiable points on the property, will be marked both on the site and on the plat map(s). These points are to be well distributed throughout the site at a density of not less than four (4) points per acre. The points must be numbered on the plat plan and in the field to provide easy identification for all parties required or interested in examining the site.

9.3 *Subsurface Sewage Disposal.*

All lots proposed with on-site septic systems shall have adequate capacity to handle effluent and meet the following requirements.

- a. A 4,000 square foot leachfield area or an area 2 times that required by State standards, whichever is greater, shall be designated and reserved on each lot.
- b. The designated leachfield must be left open and cannot be used for incompatible purposes, including but not limited to driveways or structures of any type. Parking areas may be located over the designated leachfield if chambered systems are used.
- c. Septic systems and leachfields shall be constructed and maintained in accordance with the standards set and enforced by the New Hampshire Department of Health and Welfare, by

the New Hampshire Department of Environmental Services, Water Supply and Pollution Control Division and the Town of Wilton.

- e. No septic system or leachfield shall be located in poorly or very poorly drained soils.
- f. Leachfields cannot be located in areas with finished slopes greater than 25 percent of septic systems and leachfields shall be set back from wetlands, open water bodies and perennial streams as follows:
 - 1. systems located entirely or partially in highly permeable soils (a permeability of 6 inches or greater per hour throughout as indicated in the USDA Soil Survey of Hillsborough County, New Hampshire, Western Part.) - 125 feet;
 - 2. systems located entirely or partially in somewhat poorly drained soils, moderately well drained soils or soils with a restrictive layer and a slope of 8 percent or greater - 100 feet; and
 - 3. systems located in all other soils - 75 feet.
- g. If the HISS indicates bedrock at less than three (3) feet from the surface, sufficient test pits shall be made to ensure that all required setbacks can be met.

9.4 Streets and Roads.

All streets and roads shall be constructed to meet the requirements contained in these regulations and the Road Design Standards and Specifications contained in Appendix I.

- 9.4.1 Layout. Streets and roads shall be logically related to the topography of the site to minimize cuts and fills, to provide for reasonable grades and safe intersections, and to produce usable lots. Subdivision streets shall be arranged to provide for the continuation of the principal streets in adjoining subdivisions, or for their proper projection when adjoining property is not subdivided. Connecting streets will conform in width, but in no instance will any new street be narrower than 20 feet.
- 9.4.2 Street Names. Streets which join or are in alignment with streets on abutting properties shall have the same name. New street names will not duplicate or bear phonetic resemblance to the names of existing streets within the Town of Wilton. All street names are subject to final approval by the Board of Selectmen.
- 9.4.3 Design and Construction Standards. Street and road networks, including pavement, drainage facilities, curbs and sidewalks, will be designed and constructed in accordance with the standard specifications contained in Appendix I. The road agent and/or the consulting engineer will oversee the construction of all roads and perform all required inspections.

9.5 Storm Drainage.

Natural drainage patterns and offsite runoff shall be maintained at predevelopment locations and volumes to the maximum extent feasible. Disturbed areas shall be graded to eliminate pooling of water. Provisions shall be made to control the drainage from the development through the use of a storm water management system approved by the Planning Board and/or the Consulting Engineer. Runoff is not permitted to run across the street surface; it must be directed into catch basins, ditches, or piped underground in a pipe of not less than 12 inches in diameter, or such size as may be deemed necessary by the Road Agent and/or the Consulting Engineer.

The stormwater drainage plan shall show:

- a. the existing and proposed methods of handling stormwater runoff;
- b. the direction of runoff using arrows;
- c. the location, elevation and size of all catch basins, drain-age ditches, swales, retention basins and storm sewers; and
- d. drainage calculations based on a 25 year storm frequency.

9.6 **Erosion and Sediment Control.**

A soil erosion and sediment control plan shall be provided for all major subdivisions. The erosion and sediment control plan shall conform to the standards contained in Appendix II, Erosion and Sediment Control Plan Standards, and include temporary and permanent control measures. The Planning Board may waive this requirement upon the request of the applicant. The Board may require an evaluation of the potential erosion and sedimentation impacts of the proposed development by the HCCD or other consultant selected by the Board prior to granting a waiver.

9.7 **Private Ways.**

Private ways shall conform to the following standards and requirements:

- a. finished common drive surface - minimum 16 feet with 2 foot shoulders;
- b. grade of the common drive - maximum 8 percent; however, grades of up to 150 percent of the maximum may be permitted by the Planning Board for short distances, no more than 10 percent of the total length of the common drive, on a case by case basis;
- c. grades of the common drive at the intersection with the Town road shall be constructed to a slope of not more than 6 percent downward from the road surface for at least 1 car length of 20 feet or to the existing ditch line, and shall slope up and/or down not more than 6 percent a further distance sufficient to accommodate expected vehicle storage, as depicted in the diagram in Appendix I;
- d. all loam, muck, stumps, boulders or other improper road foundation materials within the limits of the finished drive surface shall be removed and replaced with 12 inches of gravel;
- e. proper drainage shall be installed;
- f. adequate access, turning radii and turnarounds for emergency vehicles shall be provided;
- g. the location of the private way shall be depicted on the final plat with shading; and
- h. the applicant shall provide the Board with a satisfactory Declaration of covenants and Restrictions which provides for the mutual recognition of easements between the lots and the maintenance of the private way.

10.0 *PRECONSTRUCTION MEETINGS*

A preconstruction meeting will be required by the Board for all major subdivisions. The preconstruction meeting shall be held 2 months prior to the commencement of any activity on the site. The purpose of the preconstruction meeting is to ensure that all parties involved with the development of the project, including but not limited to the owner and/or the developer, the contractors and builders, the Town's consulting engineer, the building inspector and the road agent, are familiar with the approved design, the terms and conditions of the approval and that all performance guarantees are accurate and in place. In addition to the individuals listed previously, representatives from the Planning Board and the Board of Selectmen shall attend the preconstruction meeting.

11.0 *ADMINISTRATION AND ENFORCEMENT*

These regulations shall be administered by the Board, its designated representative and/or its consulting engineer charged with reviewing preliminary and final plats for completion and compliance with these regulations and for conducting on-site inspections to confirm compliance with the approved plan. The enforcement of these regulations is vested with the Wilton Board of Selectmen.

12.0 *AMENDMENTS*

These regulations may be amended by the Board following a public hearing on the proposed changes. Amendments to the regulations take effect when a copy of the amendments, certified by a majority of the Board, is filed with the Town clerk. A copy of any amendments shall also be filed with the NH Office of State Planning in accordance with RSA 675:9.

13.0 *PENALTY*

Any violation of these regulations shall be subject to a civil fine as provided in RSA 676:16 and 676:17, as amended. The Selectmen or the building inspector are designated as the local authorities to institute appropriate action under the provisions of RSA 676:17.

14.0 *ADOPTION*

These Regulations shall become effective when adopted by the Board after Public Hearing and filed with the Town Clerk.

15.0 *CONFLICT AND SEPARABILITY*

Wherever these regulations conflict with any statute, ordinance or other regulation, the provision that imposes the greater restriction or the higher standard shall govern.

If any section, provision, portion, clause or phrase of these regulations shall be declared invalid or unconstitutional, it shall not impair or invalidate any other section, clause, provision, portion or phrase of these regulations.

Sheet 3 of 3 End

CAVEAT LOT CONSOLIDATION

In Accordance with NH RSA 674:39-a, *Voluntary Merger*, and section 3.2.6, *Minor Subdivisions*, of the Town of Wilton, NH Subdivision Regulations, the following shall apply for any owner(s) of two (2) or more contiguous pre-existing approved or subdivided lots or parcels who wish to merge (consolidate) them for municipal regulation and taxation purposes.

All lot consolidations shall comply with the current Wilton Zoning Ordinance and Subdivision Regulations. Copies of this form with original signatures of the owner(s) and Planning Board or its designee shall be filed for recording at the Hillsborough County Registry of Deeds (HCRD) and submitted to the Town of Wilton Assessor. **The landowner(s) shall also present the Planning Board or its designee a legal copy of the deed(s) describing the subject lots and a signed and notarized, written statement that the lots being consolidated are not subject to separate mortgages or other encumbrances.**

** A copy of the "Caveat Lot Consolidation" form may be found on last page of the Wilton Subdivision Regulations.

16.0 INDEX OF AMENDMENTS

July 18, 2007

AMEND the Special Flood Hazard Areas sections 5.5 of the Subdivision and Site Plan Regulations with a mandatory update to remain eligible for government aid and assistance, comply with state and federal requirements, and Flood Map (FIRM) updates.

September 19, 2007

AMEND the Preapplication sections 3.1 of the Subdivision and Site Plan Regulations to remove the reference to Design Review, leaving Conceptual Consultation as the only remaining optional preapplication review. Furthermore, to:

REPEAL the Design Review sections 3.1.2 of the Subdivision and Site Plan Regulations.

October 17, 2007

AMEND the Subdivision Regulations to replace the Caveat Lot Consolidation Form with a newly designed form that more clearly states the requirements and provides for necessary documentation.

#260G-50
